## **ESSON 1.8 Practice B** For use with the lesson "B

For use with the lesson "Represent Functions as Graphs"

## Graph the ordered pairs.

**1.** (3, 4), (4, 7), (5, 10), (6, 13), (7, 16) **2.** (2, 5), (6, 7), (4, 6), (12, 10), (10, 9)

10	y							
10-								
14-	-	-	-	-	-	-	-	
12-	-							_
10-								
-8-								
-6-								
-4-		<u> </u>		-	-	-	-	_
-2-								
4	_				2 1	0 1	2 1	$\downarrow$

## Complete the input-output table for the function.

**3.** y = 3x + 2

X	0	1	2	3
y				

## Graph the function.

**5.** 
$$y = 6 - x$$

Domain: 6, 5, 4, 3, 2

**7.** y = 4x - 3

Domain: 1, 2, 3, 4, 5

1	y y

LESSON

1.8

Date \_

└ For use with the lesson "Represent Functions as Graphs"

Write a rule for the function represented by the graph. Identify the domain and range of the function.

**15.** High Temperatures The table shows the high temperature *H* (in degrees Fahrenheit) in a city during the week as a function of the number of days *d* since Monday. Graph the function. Describe how the high temperatures change as the week progresses.

Number of days since Monday, <i>d</i>	0	1	2	3	4	5
High temperature (degrees Fahrenheit), <i>H</i>	24	34	41	39	37	39

 $6\bar{x}$ 

6 x

**16. Metal Screws** The table shows the number of threads per inch on a screw as a function of screw size.

Screw size number, <i>x</i>	0	1	2	3	4	5	6
Number of threads per inch, y	80	72	64	56	48	44	40

**a.** Graph the function.

Copyright © Houghton Mifflin Harcourt Publishing Company. All rights reserved.

- **b.** Describe how the number of threads per inch changes as the screw size increases.
- **c.** Would it be reasonable to expect a #8 screw to have 32 threads per inch? *Explain*.
