Investigating Algebra Activity:
Solving $x^{\mathbf{2}}=\boldsymbol{d}$ by Taking Square Roots
For use before the lesson "Use Square Roots to Solve Quadratic Equations"

Materials: paper and pencil

QUESTION How can you solve a quadratic equation of the form $\boldsymbol{x}^{\mathbf{2}}=\boldsymbol{d}$ by finding square roots?

EXPLORE Determine number of solutions
STEP 1 Complete table
Copy and complete the table for each function in the first column.

| Function | x-value |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{- 3}$ | $\mathbf{- 2}$ | $\mathbf{- 1}$ | $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ |
| $y=x^{2}$ | $y=(-3)^{2}=9$ |  |  |  |  |  |  |
| $y=x^{2}-4$ |  |  |  |  |  |  |  |
| $y=x^{2}+4$ |  |  |  |  |  |  |  |

STEP 2 Graph functions
Plot the points generated by the table to graph each function.
STEP 3 Analyze graphs
How many $x$-intercepts does each function have, if any? What are the $x$-intercepts?

## DRAW

CONCLUSIONS
The related equations for each function in the Explore are $\boldsymbol{x}^{\mathbf{2}}=0$, $\boldsymbol{x}^{\mathbf{2}}=4$, and $\boldsymbol{x}^{\mathbf{2}}=\mathbf{- 4}$. Complete the statement using your observations from the Explore.

1. In the equation $x^{2}=d$, if $d>0$, then $x^{2}=d$ has $\qquad$ solution(s). The solution(s) are $\qquad$ ? .
2. In the equation $x^{2}=d$, if $d=0$, then $x^{2}=d$ has $\qquad$ solution(s). The solution(s) are $\qquad$ ?
3. In the equation $x^{2}=d$, if $d<0$, then $x^{2}=d$ has $\qquad$ solution(s). The solution(s) are $\qquad$ ?.

Determine how many solutions the quadratic equation has. Then solve the equation.
4. $n^{2}=-9$
5. $m^{2}=16$
6. $y^{2}-4=-4$
7. $k^{2}+10=46$
8. $2 c^{2}=-32$
9. $6 x^{2}=0$
