## Slope and $y$-Intercept

## Question How can you use the equation of a line to find its slope and $y$-intercept?

## EXPLORE Find the slopes and the $y$-intercepts of lines

STEP 1 Find $y$ when $x=0$
Copy the table below. Let $x_{1}=0$ and find $y_{1}$ for each equation. Use your answers to complete the second and fifth columns in the table.

STEP 2 find $y$ when $x=2$
Let $x_{2}=2$ and find $y_{2}$ for each equation. Use your answers to complete the third column in the table.

## STEP 3 Compute the slope

Use the slope formula and the ordered pairs you found in the second and third columns to complete the fourth column.

| Line | $\left(0, y_{1}\right)$ | $\left(2, y_{2}\right)$ | Slope | $y$-intercept |
| :---: | :---: | :---: | :---: | :---: |
| $y=4 x+3$ | $(0,3)$ | $(2,11)$ | $\frac{11-3}{2-0}=4$ | 3 |
| $y=-2 x+3$ | $(0, ?)$ | $(2, ?)$ | $?$ | $?$ |
| $y=\frac{1}{2} x+4$ | $(0, ?)$ | $(2, ?)$ | $?$ | $?$ |
| $y=-4 x-3$ | $(0, ?)$ | $(2, ?)$ | $?$ | $?$ |
| $y=-\frac{1}{4} x-3$ | $(0, ?)$ | $(2, ?)$ | $?$ | $?$ |

## Draw Conclusions Use your observations to complete these exercises

1. Compare the slope of each line with the equation of the line. What do you notice?
2. Compare the $y$-intercept of each line with the equation of the line. What do you notice?

Predict the slope and the $y$-intercept of the line with the given equation. Then check your predictions by finding the slope and $y$-intercept as you did in the table above.
3. $y=-5 x+1$
4. $y=\frac{3}{4} x+2$
5. $y=-\frac{3}{2} x-1$
6. REASONING Use the procedure you followed to complete the table above to show that the $y$-intercept of the graph of $y=m x+b$ is $b$ and the slope of the graph is $m$.
