25 Angle Relationships

| Angle Relationships |  |
| :---: | :---: |
| Adjacent Angles | Vertical Angles |
| Definition: two angles that share a side and a vertex, but no interior points | Definition: two angles whose sides are opposite rays |
| Example: | Example: 1 and 2 3 and 4 |
| Complementary Angles | Supplementary Angles |
| Definition: two angles, the sum of whose measures is $90^{\circ}$ | Definition: two angles, the sum of whose measures is $180^{\circ}$ |
| Examples: $40^{\circ}$ and $50^{\circ}$; |  |

## Practice on Your Own

Circle the better description for each labeled angle pair.
1.
 complementary angles
supplementary angles
2.

vertical angles supplementary angles
3.

adjacent angles vertical angles
4.
$35^{\circ}$ and $55^{\circ}$
complementary angles supplementary angles

Use the diagram to the right to give an example of each angle pair.
5. adjacent angles $\qquad$
6. complementary angles $\qquad$
7. vertical angles $\qquad$ 8. supplementary angles $\qquad$

## Check

Circle the better description for each labeled angle pair.
9.
 complementary angles adjacent angles
10.

complementary angles adjacent angles

Use the diagram to the right to give an example of each angle pair.
11. vertical angles $\qquad$ 12. complementary angles $\qquad$
13. adjacent angles $\qquad$ 14. supplementary angles $\qquad$
