

# **Skills Readiness** **34 Identify Similar Figures**

Definition: Two polygons are similar if corresponding angles are congruent and corresponding sides are proportional.

Similarity Theorem (SSS): If the corresponding sides of two figures are proportional, then the figures are similar.

## **Practice on Your Own**

Identify which figures appear to be similar.

1. Figure A      Figure B      Figure C      Figure D      Answer: \_\_\_\_\_ and \_\_\_\_\_

2. Figure A      Figure B      Figure C      Figure D      Answer: \_\_\_\_\_ and \_\_\_\_\_

Determine if the given figures are similar. If so, explain why.

3.  $\triangle DEF$  and  $\triangle GDF$

4. parallelograms  $ABCD$  and  $PQRS$

5. Figures  $ABCDE$  and  $RSTUV$

6.  $\triangle HJK$  and  $\triangle RST$

## **Check**

Identify which figures appear to be similar.

7. Figure A      Figure B      Figure C      Figure D      Answer: \_\_\_\_\_ and \_\_\_\_\_

Determine if the given figures are similar. If so, explain why.

8. regular pentagons  $HJKLM$  and  $RSTUV$

9.  $\triangle FGH$  and  $\triangle FKL$
